

Belluccia Pro Guidebook

The Belluccia font is dedicated to Debi's mother, aunt, and uncle...all talented creative people who inspired her to become an artist.

It was created with Brides and Invitation Designers in mind, though it is a great choice for any project seeking a custom hand lettered/ flourished look.

As a calligrapher, Debi has worked with brides for many years. While they loved the look of hand lettered calligraphy, their budgets limited their use of it. With that in mind, Debi sought to create a font that could mimic custom calligraphy at a fraction of the price. And thus, Belluccia was born, to the delight of brides worldwide!

The Pro version of the Belluccia font contains a robust language character set, and an astounding set of features, which will be covered in this Guidebook.

Let's start with the Standard Ligatures feature of Belluccia Pro. By turning on Standard Ligatures, you will notice the font change as you type, substituting double ligatures, as well as unique start and ending characters. Below are a list of Standard Ligature substitutes...

The next feature adds even more versatility to Belluccia Pro. By turning on Contextual Alternates, all of the Capitals are swapped for a new set of alternates, a majority of the lowercase is swapped, and even most of the double letter ligatures are replaced. Below are a list of the Contextual Alternates substitutes...

BUT WAIT! There is even more functionality still tucked away in this beautiful typographic wonder known as Belluccia Pro.

For special uses, Belluccia contains 5 expandable Ampersand ligatures to allow you to wrap words & names. To expand any Ampersand, make sure that you have Standard Ligatures, Contextual Alts, Stylistic Alts, or Swash enabled, then add up to 5 underscores after the Ampersand, as shown below.

Additionally, there are a small collection of Flourishes & Ornaments accessible via the Glyph Chart of whatever program you are using. The following glyphs are samplings from the Belluccia Flourishes & Belluccia Ornaments fonts. Just a taste to wet your appetite.

The possibilities are endless and overwhelming. We'd love to see what you come up with using Belluccia.
